

SupplierConnect

A comprehensive Supplier Management Solution for your existing Oracle ERP

CloudIO SupplierConnect

Helps you streamline communications and enhance collaboration with your suppliers while you achieve improved process automation and enhanced productivity.

Key Business Benefits

Reduced Costs

Cuts down supplier management labor costs and enables better control on procurement spend through 360° supplier view and performance management

Increased Productivity

Reduces manual processes and workflows by streamlining supplier transactions and communication

Reduced Risks

Improves supplier compliance while reducing operational and regulatory risks

Rich User Experience

Allows for ease-of-use, quicker change adoption and enhanced collaboration through an intuitive UI

We had a huge challenge managing a large number of suppliers and manually entering data into Oracle EBS. With SupplierConnect, we realized significant labor savings. There is no need to jump between email and ERP systems, and the entire process is automated. Most importantly, SupplierConnect plugged right into our existing process”

**Procurement Lead
(At a leading Social Media company)**

Key Features

Procurement Buyer Functions

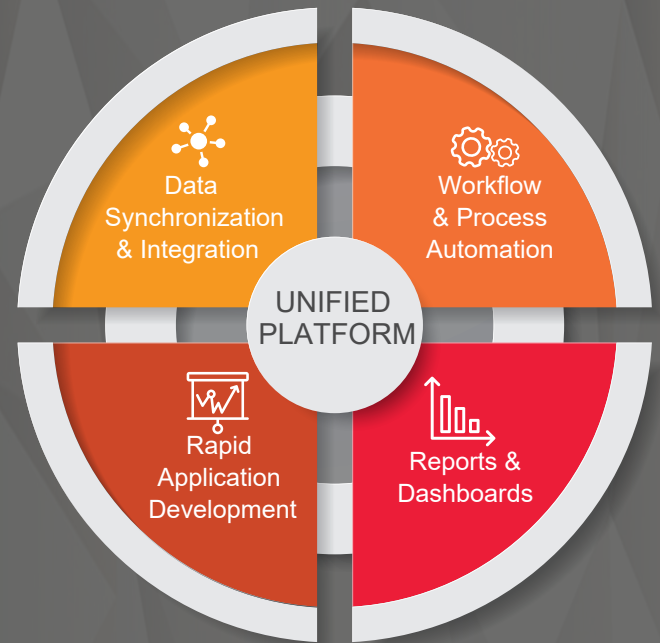

- Rapidly and seamlessly onboard suppliers at scale via a self-service portal
- Reduce cumbersome tasks associated with onboarding, collecting tax documents, providing country-specific forms, validating information in real-time (address, TIN & DUNS numbers, bank information)
- Measure, analyze and improve supplier performance through defined strategic KPIs and decrease the procurement cost via scorecard-based recommendations
- Significantly reduce procurement risks by improving supplier relationships based on improved accuracy and efficiency
- Improve utilization of key resources/staff through process automation
- Eliminate error-prone and manual tasks of managing supplier requests through email and case management tools

Accounts Payable Functions

- Streamline and automate your processes for POs, invoices and payments by enabling suppliers and accounts payable teams to collaborate effectively
- Create a centralized view of all the required supplier documents (e.g., W-9 forms) and enable automated notifications and reminders to suppliers

Supplier Self-Service Portal

- Provide full visibility to suppliers on the progress of open activities
- Facilitate self-service for suppliers to manage their information, manage the catalog, review and request changes in POs, invoices and payments
- Provide suppliers the ability to submit, track invoices and follow up on payments

SupplierConnect is powered by CloudIO Unified Platform, a highly productive rapid application development platform.

- Zero/minimal coding - Easily extendable UI which can connect to any database (on-premise/Cloud) in real-time
- Pre-built connectors to most data sources and cloud applications like Oracle EBS, Oracle Cloud, Salesforce
- Transform and Sync your data from disparate sources using data synchronization
- Orchestrate complex business processes using our advanced workflow engine
- Visualize your operational reports and dashboards using CloudIO DataSense

About CloudIO

CloudIO enables enterprises accelerate their digital transformation initiatives by leveraging pre-built solutions and application accelerators that deliver immediate business value. Architected around a common, low-code framework, that enables rapid implementation, leverages existing investments in legacy systems, and incorporates evolving technologies.
