

## The Best Alternative for Oracle Forms

Convert, Migrate & Modernize Oracle Forms to Modern Web Application

With CloudIO, you can leverage your existing investment in Oracle Forms by reusing all of the business logic written in PL/SQL and take advantage of all the below latest & greatest features of CloudIO Platform.

### Key Capabilities & Benefits

- Lower Total Cost of Ownership (TCO) - One fifth of the cost of migration when compared to ADF or any other traditional technology.
- Empowers business users by providing more user friendly interface with builtin auditing & collaboration features.
- Improved productivity with the screens that logically flow resource intense business functions.
- Provides consistent user experience with intuitive, lightweight interface the makes work a pleasure.
- Cutting edge agile platform engineered for dynamic business needs - Leverage the other features of the platform.

### Overcome Key Challenges like...

- End of Support for Oracle Forms.
- End of Support for Java on all Modern Browsers.
- Lack of resources with good Oracle Forms knowledge.
- Cloud Readiness.
- Changing Business Needs.

### Features

- Retain all the thick client features like Master-Detail,
- Multi-Record inline editing, Field, Record, Block & Form level triggers.
- Ability to use the keyboard heads down.
- Superior overall performance for data entry & navigation.
- Leverage existing PL/SQL code & skills.
- Allows complete control on the UI elements & user navigation.
- Browser friendly - works on all modern browsers.
- Mobile Friendly Responsive User Interface
- Integration with other legacy or cloud systems.

## List of Values

- Auto populate dependent fields
- 100% browser based
- Super fast & super easy to use
- 100% configurable
- Highly interactive
- Excel like sort & filters
- 100% Keyboard Support
- Inline creation & update
- Defaulting & Validation Triggers

## More than an Excel

- Freeze Columns
- Sort & Filter
- Header Filters
- Collapsible rows and columns
- Pivot
- Multi cell copy & paste
- Group by visible columns
- User personalizable views
- Export & Import from Excel

## Browser based IDE

- Drag & Drop
- Business Analyst Friendly Development
- WYSWYG
- Collaborative Development
- Built for change
- Total control to Developers
- Plugins & Custom Components
- Java or PL/SQL backend
- Access to platform source code with a valid license

The screenshot shows the CloudIO Designer interface. At the top, it says 'All Customers' and 'CloudIO Designer'. Below that, there are several form fields: 'Account Number', 'Party Number', 'Profile Class Name', 'Dunns Name', and 'Standard Terms Name'. To the right of these fields is a 'Warehouse' dropdown menu. Below the form is a table with the following data:

#	Account Number	Party Number	Party Name	Category Name	Dunning Letter Set Na...	Org Na...	Profile Class Name
1	1000	1000	World of B...	High Technolo...	STANDARD		Average
2	1001	1001	American ...	Telecom			Excellent
3	1003	1003	United Par...	Distribution			Excellent
4	1005	1005	AT&T Univ...	Financial Serv...			Excellent
5	1006	1006	Computer...				Poor
6	1007	1007	General Te...	High Technolo...			Average
7	4398	1021	Vision		STANDARD		DEFAULT

On the right side of the interface, there is a 'Text Field' properties panel with various settings like 'Field Label', 'Format', 'Formula', 'Help Text', 'Hide Label', 'Text Alignment', and 'Width'.

## About CloudIO

CloudIO empowers business users with rich UX and improved productivity by extending and consolidating existing legacy systems and business data from multiple sources together in one intuitive Platform with a real-time connection, thereby garnering a better ROI on existing investments.
