

# CloudIO CloseFAST

Speed up your Financial Close on Oracle with a powerful, interactive financial reporting solution

## Close Faster with Better Accuracy

Financial Close Reporting needs to be accurate and completed on time. Verification, reconciliations, analysis, and audits are often time-consuming and slow down your financial close.

Accounting teams need to constantly dig deep into financial data across General Ledger and SLA, during a financial close. With complex drill-down flows, getting to the root of a transaction can become cumbersome, without the right tools.

CloudIO CloseFAST cuts down these repetitive, manual financial close workflows, while leveraging your existing investment in Oracle. CloseFAST Financial Statement Generator(FSG) reports are powerful and interactive, allowing for deep drill-downs to the Nth degree, with real-time data.

## Key Business Benefits

- View the entire E-Business suite data from GL Balances to AP, AR, FA and Cash management
- Access all your General Ledger and SLA data in real-time, for time-critical financial analysis and verification
- Drill down transactions to the Nth degree with a highly interactive UI
- Get actionable information faster with highly searchable reports
- Quickly integrate with your Oracle EBS data, to use the existing FSG definitions with CloseFAST's modern UI
- Close faster with higher accuracy, by cutting down on time and manual efforts spent on analysis, verification and reconciliations

*Every time there was a question asked by the controller, we had to scramble across various systems to find the underlying details of the transaction in question. With CloudIO CloseFAST, drill down is a breeze. We look like heroes as we have the answers on our finger tips”*

FINANCIAL ANALYST **FORTUNE  
500**

## Key Features

- Real-time search and drill-down
- Dynamic multi-level drill down to sub-ledger, transactions, and attachments
- Easily configurable drill-down paths
- Interactive dashboards with visual and interactive charts
- Inherits Oracle EBS security features and reflects in real-time
- Based on standard Oracle definitions
- Any changes made to FSG definitions, reflect in real-time
- 100% browser-based with low system footprint
- Leverage Excel-like features to filter, and sort the data for real-time analysis
- Collapsible row sets & column sets
- Export to Excel, PDF, CSV, TSV, HTML, and JSON

Traditional Financial Reports on Oracle
